## Sync Your Mux Account with Wordpress

To synchronise your Mux account with Wordpress, ensure that you have already created an account. If you haven't created one yet, you can do so [here](#).

Next, follow these steps to complete the synchronisation process:

**Account Creation:** If you haven't already created a Mux account, click [here](#) to set up your account.

**API Key Input:** In the Wordpress integration settings, fill the required fields with your API Keys.

By following these steps, you can link your Mux account with your Wordpress platform.

**Mux Video Uploader** Version: 1.1.1 License: Free

**Access Tokens** Video security

Access Token ID

Secret Key

Save changes

Configure your Mux keys and start uploading your assets. Do you have questions about how to do it? Take a look at our [manual](#)

**Instructions**

The Mux Video API uses a token key pair that consists of an Access Token ID and Secret Key for authentication. If you would like to make use of the protection rules on this plugin, the generated access token from Mux must include system permissions allowed. Unless you have already done so, you can generate a new Access Token in the [Access Token settings](#) of your Mux account dashboard.

Access Tokens also belong to an Environment. Be sure to use the same Environment when using Mux Video and Mux Data together, so the data from Mux Data can be used to optimize your Mux Video streams.

**PRO**

Get ready

Coming soon

Then click on “Save changes”.

The screenshot shows the 'Mux Video Uploader' interface. At the top right, it displays 'Version: 1.1.1' and 'License: Free'. The main content area is divided into two tabs: 'Access Tokens' (selected) and 'Video security'. Under 'Access Tokens', there are two input fields: 'Access Token ID' (containing a redacted value) and 'Secret Key' (containing a redacted value). Below these fields is a green 'Save changes' button, which is highlighted with a red rectangular box and a red arrow pointing to it from the right. Below the 'Save changes' button is a grey informational box with the text: 'Configure your Mux keys and start uploading your assets. Do you have questions about how to do it? Take a look at our [manual](#)'. At the bottom, there is an 'Instructions' section with the following text: 'The Mux Video API uses a token key pair that consists of an Access Token ID and Secret Key for authentication. If you would like to make use of the protection rules on this plugin, the generated access token from Mux must include system permissions allowed. Unless you have already done so, you can generate a new Access Token in the [Access Token settings](#) of your Mux account dashboard. Access Tokens also belong to an Environment. Be sure to use the same Environment when using Mux Video and Mux Data together, so the data from Mux Data can be used to optimize your Mux Video streams.'

If the keys are correct you will have the plugin ready to start using it.

The screenshot shows the 'Mux Video Uploader' interface after successful configuration. The 'Access Tokens' tab is still selected. The 'Access Token ID' field now has an 'Edit keys' button next to it. A green success message is displayed: 'Your configuration is ready!'. Below this message, there is an 'Upload Video' button and a 'Save changes' button. The 'Instructions' section at the bottom remains the same as in the previous screenshot.

## Set your playback restrictions

Click on “Video Security”.

Add the domains where you want the protected videos to be playable.

Click on “Save changes”.

Now your playback restrictions are configured correctly.

## Asset list and Upload Asset

Existing videos will be visible in the list of assets. If this is your first time using the platform, you can begin by uploading your initial set of videos.

The screenshot shows the Mux Video Uploader interface. At the top, there's a header with the Mux logo and the text "Mux Video Uploader". On the right side of the header, there are two buttons: "Version: 1.1.1" and "License: Free". Below the header, there's a main content area. On the left, there's a section titled "Asset list" with a refresh icon and an "Upload Asset" button. Below this, there's a table with columns: "ASSET IMAGE", "ASSET ID", "STATUS", "DURATION", and "CREATED". There are two rows of assets, each with a thumbnail image, an asset ID, a "Ready" status, a duration of "0:23", and a creation date. To the right of each row is a "Copy shortcode" button and a chevron icon. On the right side of the main content area, there's a blue box with the text "PRO" and a lock icon, followed by the text "Get ready" and "Coming soon".

You can upload videos by dragging them directly to the upload area, or by clicking on "Browse".

The screenshot shows the Mux Video Uploader interface with the "Upload Asset" section highlighted. At the top, there's a header with the Mux logo and the text "Mux Video Uploader". On the right side of the header, there are two buttons: "Version: 1.1.1" and "License: Free". Below the header, there's a main content area. On the left, there's a section titled "Upload Asset" with a "View Assets" button. Below this, there's a large dashed blue box representing the upload area. Inside the box, there's a "No file chosen" message, a circular arrow icon, and the text "Drag and drop files, or Browse". The "Browse" button is highlighted with a red box and an arrow. On the right side of the main content area, there's a blue box with the text "PRO" and a lock icon, followed by the text "Get ready" and "Coming soon". Below the upload area, there's an "Instructions" section with text about the Mux Video API and Access Tokens.

After select the video a modal will be displayed, and you will have to select the options for the video.

Among all the options you can select for example the video quality clicking on the selector and displaying all the options.

Another option are the captions that you could add to your video, if you select the captions button you will be able to select the type of captions, you have two options; the autogenerated captions and the custom captions.

If you select the “Auto Generated Captions” you will have another field where you must select the language of the captions.

The screenshot shows the "Video Options" dialog box. On the left, there are sections for "Choose your asset privacy" (Protected selected), "Video Quality Tier" (Plus \$ selected), and "Instructions". On the right, the "Captions" toggle is turned on. Below it, a dropdown menu is set to "Auto Generated Captions". A red box highlights a second dropdown menu labeled "Select a language", which is open to show a list of languages: English, Spanish, Italian, Portuguese, and German. A blue checkmark is next to "English". At the bottom, there are "Cancel" and "Upload" buttons.

In the case that you have selected the “Custom Captions” and the language for the captions you will see a drag and drop field where you will be able to select your file with the custom captions.

And the last option that you could select to upload your video is the “MP4 Generation”, in this option, if you enable the field, you could see two options: “Highest Resolution” and “Audio Only” giving the possibility to create the video with download links. If the user select the “Highest Resolution” could download the video in the mp4 format but if the user select “Audio Only” could download the audio in the m4a format.

100%

To upload a protected video, you simply have to perform the same action but selecting the privacy that you want.

After the upload is complete, you can go to your asset list to manage the asset catalog.

Here you will see your uploaded videos, including data about them, duration, upload date, privacy, and so on.

By expanding each asset using the arrow, you will see all the complete information of the assets.

The screenshot displays the Mux Video Uploader interface. At the top, there is a navigation bar with a blue '2' logo. Below it, a list of assets is shown. The first asset is highlighted, and its details are expanded. A red box highlights the expanded view, and a red arrow points to the expand button (a right-pointing chevron) in the top right corner of the asset card.

**Asset list**

 Transcripts (.txt)

And you can also delete the captions created if you click on the delete button, when you click in the delete icon you will see a confirmation message to delete the captions and you can cancel or delete it.

The image shows two screenshots of the Mux Video Uploader interface. The top screenshot shows the 'Asset list' page for an asset with ID 'RDRPtabbQW...'. The asset is in 'Ready' status and has a duration of '0:01'. The 'Captions' section shows a table with one track: 'Track 1' (Ready, English). A red box highlights the delete icon (a trash can) next to this track, with a red arrow pointing to it. The bottom screenshot shows the same interface, but a confirmation dialog box is open in the center. The dialog box has the title 'Are you sure?' and the text 'You are about to delete 'English'. To restore this file, you will need to upload it again.' There are two buttons: 'Cancel' and 'Delete'. A red box highlights the 'Delete' button, with a red arrow pointing to it. On the right side of the interface, there is a 'PRO' badge and a 'Get ready' message with a lock icon and the text 'Coming soon'.

If we go again to “Add Captions” but in this case will select the “Custom Upload” you will have to select the language for the captions and also add the file in the drag and drop field to upload the custom captions.

Once you selected the language and the file, in the same modal you could see your captions file.

You could delete the custom captions file or upload it. And if you upload the file you will see the same information for the captions in the asset information.

Using the action button you can delete the asset or edit your shortcode to paste it wherever you want.

The image displays two screenshots of the Mux Video Uploader interface. The top screenshot shows an 'Asset list' table with columns for ASSET IMAGE, ASSET ID, STATUS, DURATION, and CREATED. A red box highlights the 'Copy shortcode' button and the action menu (three dots) next to it, with a red arrow pointing to the menu. The bottom screenshot shows the same table, but with a red box highlighting the 'Customize Shortcode' and 'Delete' options in the action menu. To the right of the screenshots is a 'PRO' sidebar with a lock icon and the text 'Get ready' and 'Coming soon'.

ASSET IMAGE	ASSET ID	STATUS	DURATION	CREATED

					Customize Shortcode
					Delete

If you click on “Customize Shortcode” it will display a modal where you can modify the information of your video shortcode for example: Video title, thumbnail time, autoplay, aspect ratio and so on.

## How to put videos on your pages or posts

Continuing with the above, to implement videos on your website, you can go to the page you want to edit and once inside the editor, we will add the customizable Mux block.

Once we have added our block, we will see the list of assets we want to add to our page.

What we will do is to select the video or videos we want to add and click on the insert button, so that we can visualize the player with our selected video.

The screenshot shows the WordPress editor interface for a 'Mux Video Uploader' page. The main content area displays the 'Mux Video Uploader' block with the following table:

Asset Thumbnail	Asset ID	Select
	89N5AideO94+6SkGd8pJH01u...	<input checked="" type="checkbox"/>
	9044qk1qZ5464Bv1wQ3kuwSUV...	<input type="checkbox"/>
	XH5AkZ00048ke5Lnu00cw3YyO...	<input type="checkbox"/>

Below the table is an 'Insert' button. A red arrow points to the 'Insert' button. The right sidebar shows the block settings for 'Mux Video', with the instruction: 'Choose a Video Asset from your recent list or from your media library.'

After inserting the selected video, we will see the player with our video.

## Mux Video Uploader

And once we have added the video, through the sidebar of the WordPress editor, we can configure our selected video through the settings.
